

Points about the Project Presentation

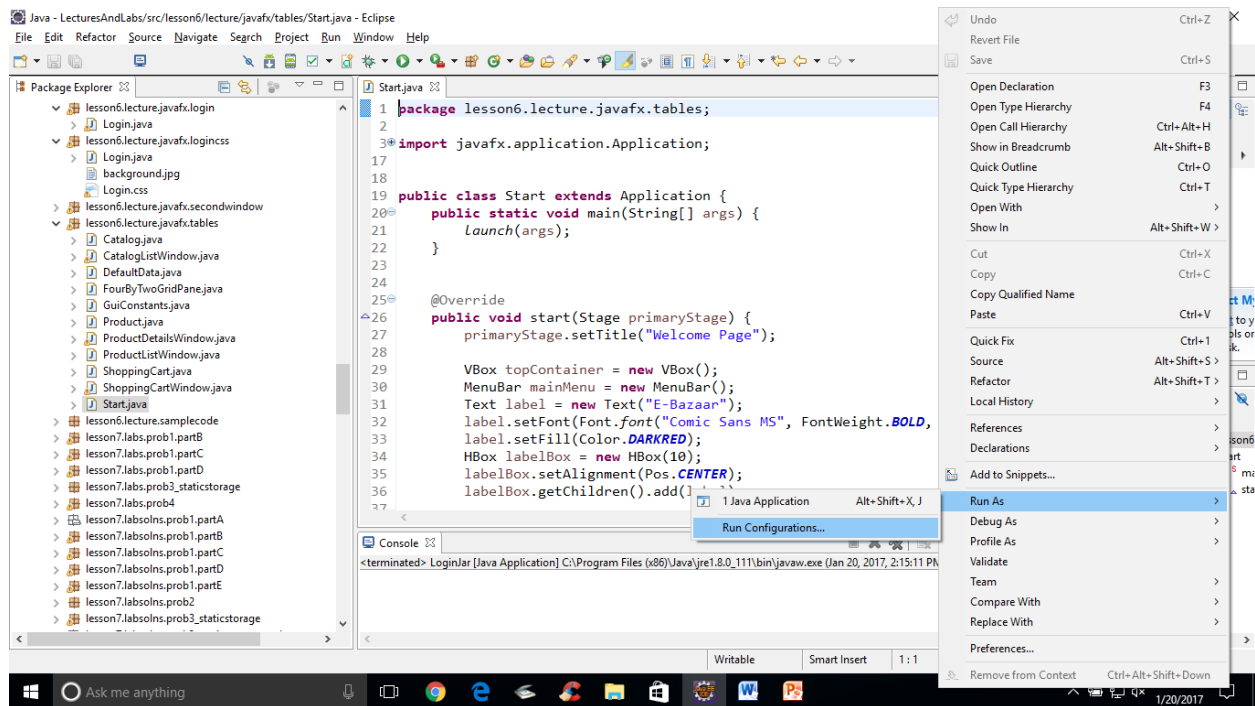

Each group will present its work on the project. Each group member should be involved in some portion of the presentation.[12 Minutes]

The presentation should show:

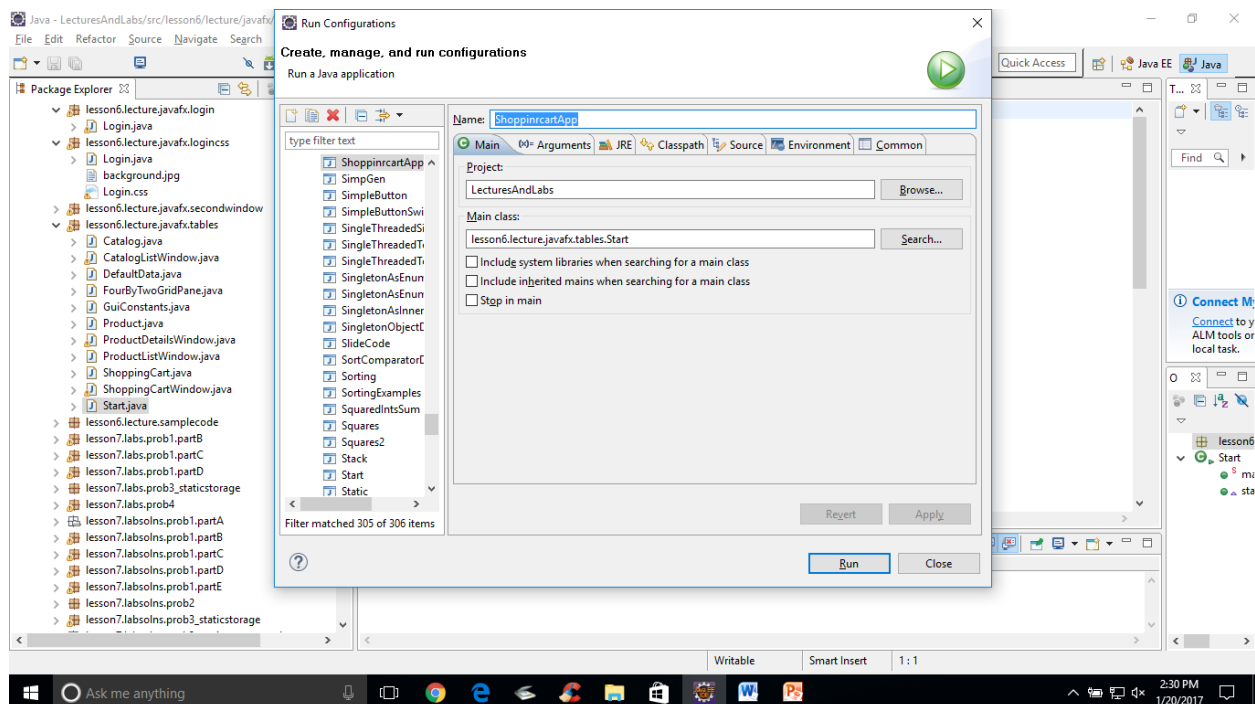

1. The final version of the class diagram with a short discussion
2. A discussion of the use cases you implemented including
 - a. A sequence diagram of the success scenario
 - b. How the use case was implemented, including
 - i. What UI features are involved in the use case
 - ii. How the UI communicates with the controller
 - iii. What the controller does in response to the request from the UI (to display data, update records, etc)
3. There should be a discussion about decisions you made concerning the design of the UI
4. Demo[Convert an Executable Jar file or use Team-Viewer to share your screen]
 - a. Team-Viewer software is available in <\\cs5\Public\Courses\CS401-MPP\Renuka>
 - b. If you use want to Executable Jar file, making of Jar file procedure is in the next page.
5. Conclusion with SCI Principle.
